Bacteria!

• Remember is REALLY IS EVERYWHERE!

• Where in the school had the most growth?

• Of your choices, which had the most bacteria growth?

• Was your hypothesis right?
Bacteria resistance

- Bacteria not killed become immune (evolve into *Mutant* bacteria)

- ALWAYS finish medications!

- Example: MRSA (nasty staph)
Today’s Lab

• First- Swab tongue-thrown swab away immediately!

• Second- lay (one disk at a time) disk onto labeled side
  – 1=Scope
  – 2=Toothpaste
  – 3=Hydrogen peroxide
Lab Safety

• All bacteria grown in incubator must go to Miss Cannon’s red biohazard bag

• All bacteria will be put into autoclave to kill it
